PROFESSIONAL SUMMARY

Dedicated Full Stack Developer specializing in the Laravel ecosystem, PHP, Django, Python, and React. With over 1 year of professional experience in web app development, I excel at architecting and developing end-to-end web applications, including comprehensive CRM, eCommerce and POS systems. Expert in designing scalable backends, interactive frontends, and robust database architectures. Passionate about clean code, modular design, and delivering seamless user experiences that solve real-world business challenges.

TECHNICAL SKILLS

Backend: PHP, Laravel, Django, Python, REST APIs, MVC, Eloquent ORM
Frontend: React.js, JavaScript, Inertia.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Authentication & APIs: JWT, REST API, API Integration, RBAC, CORS
Database: MySQL, PostgreSQL, Relational Database Design, Data Modeling
Tools: Git, GitHub, GitHub Actions, CI/CD

PROFESSIONAL EXPERIENCE

Full Stack Developer **Jul 2025 - Present**
SquartUp *Remote*

- Architected and developed a full-featured CRM & POS system (eclipseautoparts.com) for an auto parts store on Laravel with integrated eCommerce capabilities, Account 360 View, Churn Risk Detection, and Account Health Monitoring.
- Engineered automated daily analysis pipelines using Laravel Scheduler, significantly reducing manual customer analysis effort and improving business decision-making.
- Building plug-and-play modules for Laradashboard (laradashboard.com | GitHub), a Laravel-based dashboard platform — designing reusable architecture, backend logic, database structures, and integrated UI components with React.
- Collaborating remotely with clients to translate business requirements into scalable, maintainable codebases.

Lecturer **May 2022 - Oct 2025**
Department of CSE, Royal University of Dhaka *Dhaka, Bangladesh*

- Delivered undergraduate courses in Web Development, Software Engineering, and Data Structure & Algorithm, covering HTML, CSS, JavaScript, Python, and C++.
- Mentored 120+ students in full-stack development practices, Git/version control, and modern UI/UX principles.
- Supervised 15+ final-year capstone projects from ideation through implementation and deployment.

Data Analyst Intern **Mar 2019 - Jun 2019**
HappyFresh Malaysia *Kuala Lumpur, Malaysia*

- Developed interactive dashboards, reports, and data visualizations using Tableau and Redash to support data-driven decision-making.
- Analyzed complex datasets to identify trends, patterns, and business insights for operational strategy.
- Designed ETL processes to integrate data from multiple sources while maintaining accuracy and consistency.
- Collaborated with marketing, sales, and finance teams to define KPIs and performance metrics.
- Automated repetitive reporting tasks to reduce manual effort and improve reporting efficiency.

Research Assistant **Aug 2018 - Feb 2019**
Faculty of Computing & Informatics, Multimedia University *Cyberjaya, Malaysia*

- Developed deep convolutional neural network models for ECG signal compression and reconstruction using Python, TensorFlow, and Keras.
- Performed data engineering on large ECG datasets and benchmarked results against state-of-the-art

classification methods.

- Co-authored technical reports and research articles and collaborated with cross-functional research teams.

SELECTED PROJECTS

CRM & POS System

2025 - Present

Laravel, PHP, MySQL, React

- Built a production CRM and POS system tailored to an auto parts business, integrated with an eCommerce backend.
- Implemented Account 360 View, Churn Risk Detection, Account Health Monitoring, and automated daily analysis using Laravel Scheduler.
- Developed business workflows spanning customer management, sales operations, service activities, supplier processes, and procurement.

Laradashboard Modules

2025 - Present

Laravel, React, Modular Architecture

- Developing reusable plug-and-play modules for a Laravel-based dashboard ecosystem.
- Designing modular backend architecture, database structures, API integrations, and React-based UI components with clean separation of concerns.

Hospital Management System

Django REST Framework, React 19, Vite, Tailwind CSS, SimpleJWT, Axios

- Built a full-stack hospital management system using Django REST Framework and React, with a decoupled REST API architecture.
- Implemented JWT authentication and role-based access control for Admin, Doctor, Patient, and Receptionist users.
- Developed modules for departments, doctors, patients, appointments, prescriptions, medicines, and billing, including role-specific permissions and workflows.
- Implemented appointment lifecycle management with pending, approved, completed, and cancelled states, along with API-level business-rule validation.
- Built searchable, filterable, and paginated REST endpoints using Django REST Framework and django-filter.
- Developed the React frontend with React 19, React Router, Axios, and Tailwind CSS, including protected routes, role-aware navigation, responsive layouts, validation, loading/error states, and API integration.

EDUCATION

Bachelor of Computer Science

Jul 2016 - Jul 2019

Multimedia University

Cyberjaya, Malaysia

Thesis Title: Hybrid Models For The Compression Of Electrocardiogram (ECG) Signals (Design And Development of Non-Linear Models)

Foundation in Information Technology

Dec 2014 - May 2016

Multimedia University

Cyberjaya, Malaysia

HONORS & AWARDS

Yayasan Khazanah Asia Scholarship

2014 - 2019

Khazanah Foundation

Kuala Lumpur, Malaysia

Dean's List Award

2015, 2016

Multimedia University
