

Dedicated Full Stack Developer specializing in the Laravel ecosystem, PHP, and React. With over 1 year of professional experience in web app development, I excel at architecting and developing end-to-end web applications, including comprehensive CRM, eCommerce and POS systems. Expert in designing scalable backends, interactive frontends, and robust database architectures. Passionate about clean code, modular design, and delivering seamless user experiences that solve real-world business challenges.

Technical Skills

- Laravel
- PHP
- MySQL
- Tailwind CSS
- React.js
- Git
- HTML
- CSS
- JavaScript

Professional Experience

Junior Software Developer

Jan 2025 - Present

SquartUp

- Architected and developed a full-featured CRM & POS system ([eclipseautoparts.com](#)) for an auto parts store on Laravel with integrated eCommerce capabilities, Account 360 View, Churn Risk Detection, and Account Health Monitoring.
- Engineered automated daily analysis pipelines using Laravel Scheduler, significantly reducing manual customer analysis effort and improving business decision-making.
- Building plug-and-play modules for Laradashboard ([laradashboard.com](#) | [GitHub](#)), a Laravel-based dashboard platform — designing reusable architecture, backend logic, database structures, and integrated UI components with React.
- Collaborating remotely with clients to translate business requirements into scalable, maintainable codebases.

Lecturer

May 2022 - Oct 2025

Department of CSE — Royal University of Dhaka

- Delivered undergraduate courses in Web Development, Software Engineering, and Programming Fundamentals (HTML, CSS, JavaScript, Python, C++).
- Mentored 120+ students in full-stack development practices, version control (Git), and modern UI/UX principles.
- Developed comprehensive course materials, assignments, and assessment strategies aligned with industry trends.
- Supervised 15+ final-year capstone projects, guiding students from ideation to deployment.

Data Analyst (Intern)

Mar 2019 - Jun 2019

HappyFresh Malaysia — Kuala Lumpur, Malaysia

- Developed and maintained interactive dashboards, reports, and data visualizations using BI tools such as Tableau and Redash to support data-driven decision-making.
- Analyzed complex datasets to identify trends, patterns, and insights, enabling stakeholders to optimize business performance and strategies.
- Designed and implemented ETL (Extract, Transform, Load) processes to integrate data from multiple sources, ensuring accuracy, consistency, and usability.
- Collaborated with cross-functional teams, including marketing, sales, and finance, to define KPIs and create performance metrics to monitor business goals.

→ Automated repetitive reporting tasks, reducing manual effort and improving operational efficiency.

Research Assistant

Aug 2018 – Feb 2019

Faculty of Computing & Informatics, Multimedia University – Cyberjaya, Malaysia

- Developed deep convolutional neural network models for ECG signal compression and reconstruction using Python, TensorFlow, and Keras
- Conducted data engineering on large ECG datasets and benchmarked against state-of-the-art classification methods.
- Co-authored technical reports and research articles (published / under review) and collaborated with cross-functional teams on project deliverables.

Key Projects

CRM & POS System

2025 – Present

Laravel, MySQL, React

- Built a complete CRM & POS system (eclipseautoparts.com) tailored for an auto parts store, integrated with an eCommerce backend on Laravel.
- Implemented Account 360 View for comprehensive customer insights and Churn Risk Detection System with automated daily analysis via Laravel Scheduler.
- Impact: Reduced manual customer analysis effort significantly; improved client's operational efficiency.

Laradashboard Modules

2025 – Present

Laravel, React, REST APIs

- Developing plug-and-play modules for Laradashboard (laradashboard.com | GitHub), a Laravel-based dashboard ecosystem.
- Designed reusable and scalable module architecture with clean separation of backend logic, database structures, and React-based UI components.

Education

Bachelor of Computer Science

Jul 2016 – Jul 2019

Multimedia University – Cyberjaya, Malaysia

Thesis: Hybrid Models For The Compression Of ECG Signals

Foundation in Information Technology

Dec 2014 – May 2016

Multimedia University – Cyberjaya, Malaysia

Project: Movie Ticket Purchasing App

Higher Secondary Certificate

2013

Shahid Syed Nazrul Islam College – Mymensingh

Secondary School Certificate

2011

Shohagi Union High School – Mymensingh

Honors and Awards

Yayasan Khazanah Asia Scholarship

Oct 2014 – Aug 2019

Khazanah Foundation – Kuala Lumpur, Malaysia

Dean's List Award

2015, 2016

Multimedia University – Cyberjaya, Malaysia

Education Board Scholarship (SSC)

2011

Board of Education – Dhaka, Bangladesh

Education Board Scholarship (JSC)

2009

Board of Education – Dhaka, Bangladesh
